A shocking **new study** that was conducted by researchers at **Canada's University of Ottawa Heart Institute** found that **one out of every thousand(1/1000) mRNA Covid-19 vaccinations** causes heart inflammation(myopericarditis) to develop rapidly in otherwise healthy individuals.

The study looked at over 32,000 individuals who had received either the Pfizer-BioNTech or Moderna vaccines and monitored them for heart-related conditions between June 1, 2021, and July 31, 2021.

32 of the study subjects were admitted into the hospital with heart and chest-related symptoms.

“There were 15,997 doses of Moderna vaccine, and 16,382 doses of Pfizer vaccine administered over the study period, for a total of 32,379 doses. Note that these numbers represent a mixture of first and second doses.

Therefore, if our cohort captured all cases in the Ottawa area, then the incidence of myocarditis would be 0.1% of all vaccine doses (32 cases/32,379 doses x 100), or 10 cases of myocarditis for every 10,000 doses of vaccine.”

Researchers found that the symptoms show up extremely quickly after vaccination, usually after the patient's second dose. On average, people who were affected developed the condition after just 1.5 days.

They also found that men are at a much greater risk than women – only 2 women experienced heart inflammation.

“32 patients were identified over the period of interest. Eighteen patients were diagnosed with myocarditis; 12 with myopericarditis; and 2 with pericarditis alone.

The median age was 33 years (18-65 years). The sex ratio was 2 females to 29 males.

In 5 cases, symptoms developed after only a single dose of mRNA vaccine. In 27 patients, symptoms developed after their second dose of. Median time between vaccine dose and symptoms was 1.5 days (1-26 days).”

People who took the Moderna jab were 3x more likely to develop symptoms than those who took the Pfizer shot.

To date, this has been the largest case study that has looked at the correlation between Covid mRNA vaccines and myocarditis symptoms within a month of vaccination.

If the results are true, it would actually be more of a risk for anyone under 65 to receive the shot than it would be to contract the virus and recover, especially depending on how young they are. Myocarditis and pericarditis both come with an extremely poor prognosis and end up killing over 50% within 3-10 years of their diagnosis.

According to the most recent data, Americans under 65 have about a 1 in 1863 (**Population** – 273,820,000 / **Total Covid deaths** – 146,991) or .00054 chance of dying from Covid-19 or .054%. If you lower the age to 50 and under, the chance that Covid is fatal drops precipitously to .00017 or 1 in 5841 or .017%.

In other words, the chances that covid will kill you if you are under 50 are almost 6x lower than the chances you will develop a debilitating (and often fatal in the long run) heart condition.

Even more shocking – **people under 40 who take the jab are almost 13.5 times more likely to develop some form of myocarditis or pericarditis than to be killed by Covid.** Keep in mind the median age from this study was 33.

Meanwhile, Joe Biden and the tyrannical health regime double down on their goal to get “every American” vaccinated by cramming down a new dictatorial federal mandate with a third experimental ‘booster’ jab being prepared for a massive rollout.

Biden Regime Drops Iron Fist on Private Sector: Will Require Vaccines or Weekly Covid Testing – Employers That Don't Comply will Face “Substantial Fines”

The Biden Regime will be dropping the iron fist on the private sector by requiring all employees get jabbed or tested weekly for Covid... OR ELSE. In addition to telling all 2.1 million federal employees to get jabbed in the next 75 days or face firing, the Biden regime will be forcing all companies with ... Continue reading

Biden Regime Drops Iron Fist on Private Sector: Will Require Vaccines or Weekly Covid Testing – Employers That Don't Comply will Face “Substantial Fines

The Covid-19 vaccine has been so ‘effective’ in ‘protecting’ people that the masses will now be pressured into taking another dose as new outbreaks of the virus have forced a new wave of authoritarian restrictions.

Every single American has known for months where to go and how to get a vaccine if they wanted one. In fact, over **181 million eligible** citizens have been fully vaccinated in the US – If the virus was as deadly as they are making it out to be, they wouldn't have to mandate people to take the vaccine; and on the other end, if the vaccines provided the protection they're supposed to provide, the vaccinated wouldn't be calling people killers because they are refusing to ‘protect others.’

Besides, **according to available data, a third of the entire US population had contracted Covid BY THE END OF 2020.**

Natural immunity has always proven to be superior to vaccines.

A recent study that was conducted in Israel on 800,000 individuals confirms that is especially the case with the rushed mRNA Covid vaccines.

They found that individuals who had received both doses of the Pfizer-BioNTech vaccine were 13x more likely to contract Covid-19 than those who had natural immunity – Fully vaccinated people were also found to be at a “GREATER RISK OF HOSPITALIZATION.”

New Israeli Study Finds Fully Vaccinated People are at “Greater Risk of Hospitalization” and 13 TIMES MORE LIKELY to Catch Covid-19 Than Those Who Have Recovered and Have Natural Immunity

A new study out of Israel has seemingly confirmed that individuals who have natural immunity have better protection against the NEW DELTA VARIANT than people who are fully vaccinated.

The team of researchers, from Maccabi Healthcare and Tel Aviv University, published their study earlier this week to medRxiv.org. 'This study demonstrated that natural immunity confers longer ... Continue reading

If 1/3rd of Americans had already contracted the virus – before it had even been known for a full year – then why would “everyone” be forced to take the experimental vaccine?

Exactly what sCiEnCe is being followed with these vaccine mandates and passports?
