

OSHA SAYS MASKS DON'T WORK -- AND VIOLATE OSHA OXYGEN LEVELS

Posted on: Thursday, June 18th 2020 at 5:00 am

[name and details removed] explains how the US. Department of Labor Occupational and Safety and Health Administration's guidelines clearly show cloth and surgical masks don't work to reduce transmission of COVID-19, and how they deplete the body of oxygen causing adverse health effects.

[Update: Peggy followed up with a second video below titled, "Your Mask Protects Me?"]

CAL-OSHA states, "Cloth face covers are not protective equipment and do not protect the person wearing a cloth face cover from COVID-19." [link removed]

File a workplace safety complaint: [link removed]

Given the lack of evidence for their use, and flip-flopping advice both against and for their use by authoritative health agencies like the WHO, the incoming pressure to wear masks in public — and the decreased ability to access basic services required to maintain one's health, liberty and livelihood — constitutes an unnecessary power grab and means of controlling the population

Given the **lack of evidence** for their use, and flip-flopping advice both against and for their use by authoritative health agencies like the WHO, the **increasing pressure to wear masks in public** — and the decreased ability to access basic services required to maintain one's health, liberty and livelihood — **constitutes an unnecessary power grab and means of controlling the population.**

STAND FOR
HEALTH FREEDOM

The decision to wear a mask is highly personal and should not be universally mandated; measures that are meant to protect the community are ineffective if they hurt individuals in that community. Please email and tweet your state and local officials now and urge them to do their part to make sure that mask-wearing is voluntary, not mandatory.
