

# **EXCLUSIVE: Per the CDC There Are Nearly Twice As Many Vaccine Related Deaths SO FAR in 2021 (1,755) Than All the Vaccine Deaths this Past Decade (994)**

Mar. 29, 2021 4:52 pm610 Comments

**There are more US deaths related to vaccines in 2021 in less than 3 months than there were the entire past decade.**

The number of deaths related to vaccines this year has absolutely skyrocketed. According to the CDC's own data, in 2021 in less than 3 months, we have already seen over 1,750 deaths due to vaccines in the US.

This data comes from the CDC's VAERS database:

"The Vaccine Adverse Event Reporting System (VAERS) database contains information on unverified reports of adverse events (illnesses, health problems and/or symptoms) following immunization with US-licensed vaccines. Reports are accepted from anyone and can be submitted electronically at [www.vaers.hhs.gov](http://www.vaers.hhs.gov)."

The ages of those who have died plies with the elderly:

**Messages:**

- VAERS data in CDC WONDER are updated every Friday. Hence, results for the same query can change from week to week.
- These results are for 1,725 total events.
- Rows with zero Events Reported are hidden. Use Quick Options above to show zero rows.

Year Died	Age	Events Reported	Percent (of 1,725)
2021	1-2 years	1	0.06%
	18-29 years	12	0.70%
	30-39 years	17	0.99%
	40-49 years	32	1.86%
	50-59 years	94	5.45%
	60-64 years	95	5.51%
	65+ years	1,431	82.96%
	Unknown	43	2.49%
	<b>Total</b>	<b>1,725</b>	<b>100.00%</b>
<b>Total</b>		<b>1,725</b>	<b>100.00%</b>

Note: Submitting a report to VAERS does not mean that healthcare personnel or the vaccine caused or contributed to the adverse event (possible side effect).

Top Options Notes Citation Query Criteria

**Notes:**

**Caveats:** VAERS accepts reports of adverse events and reactions that occur following vaccination. Healthcare providers, vaccine manufacturers, and the public can submit reports to VAERS. While very important in monitoring vaccine safety, VAERS reports alone cannot be used to determine if a vaccine caused or contributed to an adverse event or illness. The reports may contain information that is incomplete, inaccurate, coincidental, or unverifiable. Most reports to VAERS are voluntary, which means they are subject to biases. This creates specific limitations on how the data can be used scientifically. Data from VAERS reports should always be interpreted with these limitations in mind.

The two primary vaccine manufacturers who have the most deaths related to their vaccines are Moderna and Pfizer/Biontech:

Based on a report from the CDC through February 16, 2021, there were over 55 million individuals who have taken the COVID-19 vaccine and most

of these vaccines were either manufactured by Moderna and Pfizer/Biontech:

## Summary of v-safe data as of February 16, 2021

	Pfizer-BioNTech	Moderna	Total
People receiving 1 or more doses in the United States*	28,374,410	26,738,383	55,220,364
Registrants completing at least 1 v-safe health check-in	1,776,960	2,121,022	3,897,982
Pregnancies reported to v-safe†	16,039	14,455	30,494

Although the percentage of individuals who have died from the COVID-19 ‘vaccine’ is minuscule (less than 0.003%) the number of deaths in 2021 already is WAY OVER (71 times) the average for the past decade.
